

### Auto Pan Display

Visual feedback for the LFO intensity, waveshape, phase and offset

### Modulation Amount

Set the amount of LFO modulation to be applied

### Normal/Invert Switch

Flip the LFOs phase

### LFO Rate Type

Switch between free rate (Hz) and synced rate (Note Divisions)

### LFO Rate

Set speed of LFO modulation.

**Hz Rate** - will change rate by Hertz

**Sync Rate** - change rate by tempo-synced beat divisions

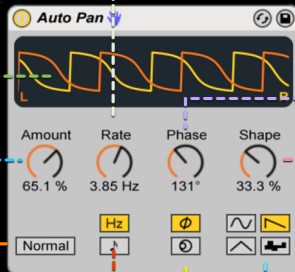

### LFO Phase/Stereo Width

Set the amount of offset between the left and right channel LFOs. at 0° and 360° only one LFO will be audible and usable.

When **Random** wave is selected: **Width** knob will set the differences between left and right random shapes. Identical at 0%

### Waveform Shape

"Harden" or "Soften" the shape of the LFO. Morph between selected LFO waveshape to a squared wave

### LFO Stereo Mode/Offset

In Hz rate type: Switch between LFO Offset and Spin  
In Synced Rate type: Shift the starting point of the LFO

### LFO Waveform

Select between Sine, Sawtooth, Triangle and Random LFO Waveform
