

### Modulation Amount/LFO Waveshape

**Amount:** Set the amount of **LFO Modulation** to be applied.

**Shape:** Select LFO Waveform shape

### Modulation Rate

Set the speed of **modulation** by Herz (**Hz**) or Tempo-Synced note division

### Coarse Tuning

Set the amount of **frequency shifting**.

### Modulation Mode

Switch between Frequency Shifting and Ring Modulation.

### Drive

Turn on/off distortion. Set level with slider. Only available in **Ring** mode.

### LFO Stereo Mode

Switch between **LFO Phase Offset** mode and **LFO Spin Offset**.

**LFO Phase:** Adjust the amount of offset between the left and right channels

**LFO Spin:** Detune the two LFO speeds relative to each other

### Wide

Switch between **Fine Tune** knob to **Spread** knob. In Spread mode the polarity of the right channel will be inverted.

### Fine Tuning/Spread

**Fine Tune:** Fine Tune the Frequency Shifting  
**Spread:** Shifting the frequencies in opposite direction for the left and right channels
