

### Pitch Transposition

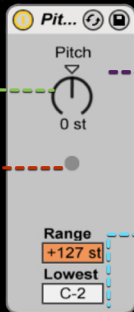

Adjust the **pitch** of incoming MIDI notes by the selected number of **semitones**

### Pitch

**Pitch** allows the transposition of incoming MIDI notes by +/- 128 **semitones**

### Blocked Note Indicator

When an incoming note does not lie within the note range defined by **Range** and **Lowest** this LED lights up to indicate the note has not passed through the device

### Accepted Note Range

Define the accepted note range of the device - **Lowest** sets the lowest accepted note and **Range** controls how high above **Lowest** the range will extend
