

Bit Reduction

Set the **Bit Depth** (Amplitude Resolution) of the output. Only has effect if the Bit Reduction switch is on.

Overload Indicator

If light is on, signals above 0dB will be clipped by the **Bit Reduction** section

Bit Reduction On/Off

Switch the **Bit Reduction** Section On/Off

Downsample Resolution

Set the distance between samples that are passing to the output.

Setting of 1 - Every sample will output

Setting of 20 - Only every 20th sample is heard

Downsample Mode

Toggles between **Hard** and **Soft** downsampling.

Soft: Downsampling with interpolation down to 20 samples

Hard: Downsampling without interpolation down to 200 samples
